AGE WELL!**

MEET THE MWFR MDXminiPRO

Take this treasure home and gain a new perspective on life, says its creator Maxine Warsh. "I believe that when you look better that you feel better and I want the whole world, and definitely the people I know, to feel a whole lot better."

TRY THE "ELECTRIC FACE LIFT"

"I keep hearing that it's empowering and confidence-building when you feel good about yourself from my clients and friends, and I so wanted to pass it on. That's why I had my engineers build on the science and salon history of my professional microcurrent unit to create the MDXminiPRO. My clients wanted a way to take me (aka my microcurrent!) with them on their travels or have an option when they couldn't drop in for treatment or maintenance." This is it. Maintain your youthful glow and keep your skin looking its very best and do it all in private at home—look and feel great for every date and every meeting or just for you.

MWFR helps you look your best (and feel absolutely wonderful!) with the MWFR MDXminiPRO cosmetic microcurrent for private home use and Collagen Correction for skin rejuvenation. Treat yourself to the best—and your face, hands, neck and décolleté.

BEST PRODUCTS FOR REJUVENATION?

For skin renewal, it’s important to know and choose the best products and techniques. The jury’s still out on whether all injectables are safe. ‘Remedial’ treatments such as laser may not always be carried out by dermatologists or cosmetic surgeons and this may be risky for the consumer.

TAKING CARE OF YOU

“Clients tell me they love feeling empowered and know they’re treating themselves to the best to look their best. Nurturing your skin and yourself is a good thing and so are happy clients!” *Maxine*

NO WORRY FACTOR

Because microcurrent is entirely non-invasive and non-surgical, unlike other anti-aging options, there’s no uncertainty. It’s gentle and safe. No needles/no punctures, no bruising or downtime—which may be why microcurrent rejuvenation is so popular with celebs (both women and men).
